SUMMARY

Senior Frontend Developer with over 10 years of experience building and maintaining scalable, high-performance web applications using React, Next.js, and CMS platforms. Skilled in delivering intuitive, user-centric interfaces while collaborating with cross-functional teams to enhance user experiences and drive business results. Focused on continuous learning and improving processes to create innovative solutions.

WORK EXPERIENCE

Senior Frontend Developer, Fidibo / Tehran, Iran   FEBRUARY 2024 – PERESENT

Developed an innovative digital book platform that enhances the e-reading experience for users, promoting over 1 million titles and increasing user retention by fostering engaging reading habits.

- Produced innovative gaming features aligned with market trends; findings from user feedback identified key elements increasing enjoyment and interaction levels for over 10,000 unique app users monthly.
- Conducted structured refactoring initiatives quarterly to optimize the existing codebase; this effort decreased average page load time by 30% while also elevating overall SEO performance within competitive markets.
- Coordinated closely with HR during recruitment events to optimize candidate selection processes; introduced structured interviews, resulting in a 20% increase in successful hires from these events.
- Collaborated with the CTO and a newly formed team to implement three high-impact projects, resulting in a 25% increase in operational efficiency and positioning the company for scalable growth within the next fiscal year.

Frontend Developer, Freelance / Remote   JUNE 2015 – FEBRUARY 2024

Provided frontend development services for various clients across industries, focusing on delivering high-performing, user-friendly web applications.

- Designed and launched mobile-responsive websites for four unique industries; analysis of user behavior uncovered actionable data that boosted user engagement metrics, driving over 1,500 additional monthly page views across platforms.
- Partnered closely with cross-functional teams including UX/UI designers and backend developers; refined workflows, cutting project delivery time by an average of 15 hours per client engagement.
- Delivered five concurrent projects within tight timelines, achieving a 98% client satisfaction rate; created feedback mechanisms that improved communication and transparency with clients throughout the project lifecycle.

Senior React Developer, MATNA / Tehran, Iran   DECEMBER 2021 – DECEMBER 2023

MATNA is a medical solutions provider, specializing in software systems for healthcare professionals and institutions.

- Developed and implemented offline functionality to enhance user experience in low-connectivity environments, enabling seamless access to critical health data for over 5,000 medical professionals during field operations.
- Optimized the performance of medical software systems, achieving a 40% reduction in load times and improving user satisfaction scores by implementing efficient coding practices and advanced caching techniques.

- Built a coding resource library for junior developers, featuring tutorials and best practices for React and PWA; over 10 team members now use the resource, contributing to ongoing skill enhancement.

Senior Frontend Developer, Yalda / Tehran, Iran   DECEMBER 2020 – JUNE 2021

Yalda provided development services for local and internet-based projects, focusing on modern frontend technologies.
- Engineered responsive web applications with Vue.js and React.js, elevating functionality for client projects; the implementations achieved a 50% reduction in page load times and enhanced overall user experiences.
- Created responsive web applications utilizing Vue.js and React.js, leading to a reduction of troubleshooting incidents by 60%, and resulting in significant time savings for the technical support team handling user queries.
- Facilitated mentorship programs with bi-weekly check-ins for five junior developers; led them through complex project tasks which improved collaboration speed across the entire team by 30%.
- Streamlined workflows by introducing modern development practices, accelerating project delivery by 20%.

JavaScript Developer, Apasai / Tehran, Iran   MARCH 2018 – MARCH 2019

Apasai focused on building local front-end applications and delivering web solutions for various clients.
- Streamlined the development process by rewriting outdated code segments, resulting in a 50% reduction in bug reports and improving maintainability, allowing the team to focus on new feature development without interruptions.
- Resolved 15 technical obstacles during app development, resulting in a more robust platform; subsequently, a 50% decrease in customer support requests related to app functionality was achieved within six weeks.

Frontend Developer, WebCade / Tehran, Iran   JUNE 2015 – FEBRUARY 2018

WebCade specialized in developing responsive websites and content management systems tailored to meet the unique needs of various clients, ensuring robust functionality and seamless user experiences.
- Delivered 20+ websites using DNN CMS and JavaScript for diverse industries.
- Led a series of 12 technical workshops, focusing on process optimization and collaboration; engagement from participants fostered a culture of innovation, improving team efficiency and contributing to enhanced project outcomes.
- Facilitated technical discussions with 12 team members to refine project goals and coding standards; established a shared knowledge base that increased team efficiency by 35% and reduced onboarding time for new hires.
